Danya Rogers Cohan
Gotham Telecom

Dear Danya:

We wanted to thank you and your team at Gotham Telecom for a great job working with us since 2010.

We initially engaged your firms to project manage several areas during a transition of support providers. You were able to assist us with procurement and renegotiation of Carrier agreements world wide, support vendors for voice and data, procurement of new equipment and day to day support.

You have been able to deliver the right solutions with short timelines domestically and internationally.

The solutions and recommended providers were creative, within budget and on time. You were able to work well with all of the teams including construction Project managers and Architects as well as all of the related vendors.

Your company is a valuable asset to ours from working on a projects or just kicking around ideas. Using Gotham has provided us with efficiencies and access to expertise.

Your advisory services have helped us to procure the highest level of expertise in each area where you were engaged as well as to optimize our expenses. **We estimate that our annual savings exceed \$175, 000.**

It is always a pleasure working with your company and I look forward to our continued partnership.

Sincerely,

A handwritten signature in black ink, appearing to read 'Mark Levitt', written over a white background.
