To Whom It May Concern:

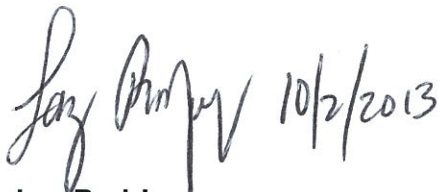

It is my pleasure to recommend the Telecommunications services of Gotham Telecom. During the past year, our IT team has worked directly with Danya Rogers-Cohen, CEO of Gotham Telecom and the rest of her team on our overall IT Telecom spending budget. The company offers top-notch professionals who understand the industry plus great services and rates. We are very pleased with Gotham's due diligence, deliverables and recommendations to save bottom line operating costs.

Our project in particular illustrates their attention to detail and concern for quality. For our corporate MPLS network and our Retail stores phone lines, The Gotham Telecom team was able to find numerous billing errors, disconnected lines still being billed and also provide guidance and direction on how to do things differently, to realize greater savings and gain services. We were able to capitalize on savings that affected our bottom line immediately. We believe that their creativity and knowledge of Telecommunications services led to that success.

Please consider Gotham Telecom for all your corporate Telecommunications needs.

I recommend Gotham and look forward to working with them again.

Sincerely,

Laz Rodriguez
